Get the best of both worlds!

iTrack is an effective, affordable Thatcham S5 vehicle tracking system and one of our leading products. Specially designed with you and your vehicle's security in mind, the iTrack wired-in unit pushes towing, low battery, and motion detection notifications straight to your phone. With our easy-to-use app, you can even immobilise your motorhome in just a few clicks.

Looking for an Alarm and Tracking unit? Sentinel is our Thatcham S5 security combo for Motorhomes. The Sentinel system stops thieves in their tracks with motion-detecting alarms, ignition control, and immobilisation, specially designed to provide you and your vehicle the highest level of security possible.

 **Tracking**

View your vehicle's location, battery life, mileage, and other insights at the simple touch of a button with our app and/ or web portal.

 **24hr Recovery Call Centre**

Our control centre team work around the clock to provide you with 24-hour protection, 7-days a week.

 **Euro-Wide Roaming SIM**

A roaming SIM enables our system to bounce from one network to another for the best signal strength available so we can always gain a position on your asset.

 **Tow Alerts**

We use motion sensors to detect when your vehicle is being towed so we can rapidly identify potential theft.

 **Power Cut Alerts**

If the tracker is disconnected from the vehicle battery, the device uses an internal battery to send a power-cut alert to our 24hr recovery centre.

 **Low Power Alerts**

Gain insights about your vehicle, such as low power alerts via text notifications or the MyPhantom app.

 **MyPhantom**

Our MyPhantom app and web portal provide you with access to important information and reports about your vehicle simply.

 **Driver Recognition**

Automatic Driver Recognition (ADR) is standard with our S5 and Ultimate systems. If your vehicle is moved without a tag present, we immediately trigger an alert.

 **Immobilisation**

Stop thieves in their tracks with our Ultimate device, immobilise your vehicle with ADR or, immobilise remotely using our Ultimate device.

### OBD Protection

Thieves can now steal your car using the car's OBD port and programming a new key using your car's ECU. OBD Protection is beneficial in preventing your vehicle from this method of theft. It can also stop remote key cloning if an attempt is made you will get alerted.

### Alarm Interface

The iTrack device can connect to your existing alarm system (if you have one) and notifies our 24hr control centre when triggered.

### Free Nationwide Fitting

Our nationwide network of accredited installers provides a top-tier installation service, even offering full parts and labour guarantee. So you can relax knowing your system is properly installed by professionals.

# “WHERE’S MY VEHICLE?”

**WE KNOW! >>>>**

## Secure your vehicle!

Protecting a vehicle against theft is important. Vehicles are a favorite target for criminals, often because of inadequate security.

It is therefore recommended by insurance companies to protect your bike with an after-theft recovery system.

The Mi01 Sentry tracker is a retrieval system with worldwide coverage. After theft, the position from our beacon to the meter passed on, so that our recovery team can locate a beloved vehicle.

Scan and read more!

**OVER 12,000  
SOLD IN EUROPE**

**The Mi01 Sentry Tracking Transmitter is a watertight after-theft recovery system with Eurowide coverage. After installation and activation, the extremely compact level transmitter indicates where it is located once a day. After theft, the frequency of position transmission is increased and the transmitter can be traced accurately to the metre.**

**HOW DOES THE MI01 SENTRY WORK?**

The Mi01 Sentry uses GSM, GPS and even has a fallback RF Signal. Programmed to send its location once every 24 hours the Sentry is nearly impossible to detect. Users can change the location frequency via our Mi App, and in the event of theft the unit will update to stream its location until its recovered.

**THATCHAM ACCREDITED**

Thatcham's strict and rigorous assessments, evaluating performance, manufacture, and service, gives you complete peace of mind. Knowing your Moving Intelligence system is reliable, and provides your vehicle with the protection it needs.

**SIMPLICITY AND USER-FRIENDLY**

The compact size of the Mi01 Sentry can be installed out of sight virtually anywhere in any vehicle or asset. With the built-in internal battery, the Sentry has no effect on the existing electrics, and this system operates entirely wirelessly.

## PLANT TRACKING

Our range of Plant tracking solutions come with; over 20 years of industry experience, top quality service, and the best technologies available for plant, construction, and agricultural equipment. Enjoy peace of mind knowing your high value assets are protected by industry leading experts.

### AT4

Robust Battery Operated Tracking and After Theft Recovery Solution

Suitable for powered and non-powered assets, our AT4 device (known as 'The Rock') is specially designed for rough and rugged environments. Utilising both GPS and GSM technologies while supported by a multi-network sim, these fallback technologies allow a position to be gained where other devices may be blind.

Its name 'The Rock' comes from the device's internal components which are encapsulated in resin, functioning as an unparalleled defense against outside elements.

## VT100

### 2-Wire Self Installed Tracking Solution

The VT100 is the go-to ultra-powerful GPS tracking system for ever-changing fleet management. Set-up requires a simple 2-wire installation, making it easy to transfer from one asset to another in minutes.

Compatible with a wide range of; plant, construction, agricultural, and other vehicle fleets, the VT100 facilitates a more dynamic operation of your assets. Detailed reports such as, live tracking, journey logs, service reminders, and other industry specific data can be accessed instantly or at any scheduled time.

## VT202

### Hard-Wired Asset Management Solution

The VT202 is the ultimate tailor-made device, programmed specifically to support you and your fleet's needs. As our flagship solution, the VT202 can host a range of data-driven features, from detailed reports, driver identification, wireless temperature sensors, panic buttons, volumetric sensors, and so much more.

Distinctly, the VT202 has several immobilisation options, for instance using a 'no key no start' driver recognition system, keypad locking with over 500 codes, scheduling ignition times, and remotely from our web browser platform or easy-to-use app.

# ASSET+

The Unrivaled Hybrid Solution

The Asset+ is the UK's first hybrid tracking solution. This dual-action unit combines comprehensive features from a hard-wired asset management system with a separate, covertly installed battery-operated after-theft device.

By using the Asset+ you gain a full overview of your vehicle and the peace of mind that comes with the best after-theft recovery technology - proven by our industry-leading recovery rates. This solution also works great with our optional keypad immobilisation feature, allowing for triple-layer protection for your assets.

# KEYPAD IMMobilISATION

Double/Triple Layer Protection

The keypad immobiliser provides a robust and secure driver/operator authentication system to prevent theft. This system works alongside the VT202 for double protection, or the Asset+ for Triple Layer protection.
